Organized System availability [%] 87%

Organized System availability (excluding breaks) [%] 93%

In system availability considered time for **Breaks per shift** [min] **45.0 min**

Maintenance / Week 300.0 min

Total Setup time / Week 240.0 min

Qty of setup / week 4

*** If the "Unplanned iInterruptions" cannot be catched during Production tracking, Pls fill in the "Referenced Theoretical Unplanned interruptions" data which be calculated by <Capacity record & calculation sheet>**

Counted Unplanned interruptions for whole tracking process **in Each shift** **35.4 min**

Real "Planned System availability [%]" For replace the Ori. Data in <Capacity planning sheet> 83%
