Skills

- Structure the supply chain & Risk management

Establish SCM system, Supply chain risk prevention and handling, Supply chain security strategy

- Supplier management

Improve production & delivery capacity, Supplier KPI assessment, Support supplier to launch

- Lecturer & Knowledge management

Make the focus of work into courseware and train trainees

- Capacity management with Excel

The core of the capacity management is the ability of switch of info & data, Excel is the essential ability.

Certification

English level CET4

Certified Time: 2004

Process-Auditor to VDA6.3

Certified Time: 2011

Self-Evaluation

- Strong analysis and logic, skilled in finding the reasons of the problem and solving the problem with the best solutions
- Good at summarizing and forward-looking, be the conditions for process description, reporting, courseware production and training.
- Good at communication & team work. Can enjoy the multi-angle environment of the group company, internal leaders and colleagues, suppliers and customers at the same time.

Education

2002/Sep. ~ 2006/Jul

Marine engineering

Shanghai Maritime University

Bachelor in Engineering

Working experience

2006.02 ~ Now Shanghai Volkswagen powertrain Co.,Ltd

2016/Feb.~ Now

Export of SCM(BKM)

- Lead the BKM team to complete the annual goal
- Planning the production capacity of the supplier based on the strategic of the Volkswagen Group
- Representing the company in the resources allocation of Volkswagen China
- Manage supplier' s KPI (covering 130+ suppliers and 500+ parts in total), and coordinate the optimal solutions. The assessment content covers: capacity status, delivery accuracy & timely rate, packaging status, etc.
- Carry out logistics audit on batch suppliers and determine their nominations for new projects.
- Foresee, analysis and summarize the supply risks, and formulate solutions to ensure series production. It has been for 5+ continually years to ensure that no supply chain issues affect the series production.
- Provide relevant advice of supply status to S&OP, and guide future monthly production plan.
- Assist the supplier' s production launch of new projects. Supported some factories ramp-up of a number of top 10 foundry companies in China.
- Cooperation with VGC, FAW-VW, SVW (Group level), as well as purchase, logistics, financing, engineering, quality and other departments (Corporate level) be the cross-function cooperation, jointly solve supply chain risk.
- Teaching and in-house training for the employees of the BKM team and hired by SAIC training center be the external lecturer.

2006/Jul. ~ 2016/Jan Disposition & Material planning Specialist

- Operate the SAP MRP module, make a part material plan and publish it via WEB-EDI
- Maintain MRP related data, control delivery cycle, minimum order batch, safety stock, etc.
- Promote the improvement of the logistics operation quality of suppliers, and assist packaging & transportation engineers to reduce logistics costs.
- Tracking parts arrive, if necessary expediting.
- Based on materials supply situation, assist in the production planner for effective planning.

Volkswagen Powertrain internal trainer development project (2020)

End to end participated in the project, and was selected as the company's only lecturer to participate in the "SAIC Group Lecturer Competition" , and finally entered the finals.

Achievement: With the outstanding performance, I was awarded the title of "Golden Microphone" Good Lecturer of SAIC, and was hired as an external lecturer of SAIC Training Center.

Supply chain environmental protection risk assessment project (2017-2018)

Project leader, led the entire operation of the project. At the end of the project, summed up the practical experience to sort out the workflow and assessment tools.

The project team is a cross-departmental team, led by the BKM team to coordinate Purchaser, SQE, HSE and other departments to carry out the work together. The content includes: Production process screening & classification, Production site inspection, Environmental protection inspection and information archiving, etc.

Achievement: Ensuring supplier (and lower) 100% of the no environmental protection risk that affect delivery but also enriches the dimensions of Volkswagen's SCM. The workflow and evaluation tools are being promoted to the entire Volkswagen Group.

SRS-supplier rating system online project (2016)

The project leader of VWPT, as the company's Key user, participated in the system launch, and participated in the formulation of supplier logistics evaluation rules and system development.

This project ensures that the system goes online on time, which greatly helps and improves the KPI for supplier logistics operations. Finally, the logistics operation level of the supplier is improved through a reasonable evaluation system.

Achievement: One year after the system started running, the average score of the 130+ suppliers in the initial stage was 87 points (level B) up to an average of 92 points (level A).

- The evaluation result of this system is one of the condition of supplier to get Volkswagen's new project.

Cam localization project (2015)

The core members of the project, calculated and formulated the project node and participate in the whole process of the project.

Before the project, Volkswagen China cam raw part is 100% CKD parts. Traditional three "H" characteristics of imported parts: The High price, the High transportation cost, High difficulty of management.

Achievement: This project is the first EA211 engine cam localization project, which solved the long-term supply capacity problem of cam raw of Volkswagen China, and finally successfully nominated and made the local supplier into series supplying.

- The project also won the 2016 "Shanghai Key Product Quality Achievement Award" Certification: 2016010043

SAP-MRP & Web-EDI start-up project (2009)

The core members of the project, participated the entire process in the project, MRP and Web-EDI's Key user.

Before the project, material planning' s work is: "Excel" plus "manual E-mail" .

Achievement:

1. Completed the requirements for systematization and automation of material planning. Help VWPT to upgrade from a factory with an annual output of 100,000 units up to 1 million units.
2. The innovation concept of "time window" to enhance the effective warehouse "Receiving" efficiency and reduce logistics costs. At the same time, it also meet the necessary conditions VWPT' s logistics system to pass the Volkswagen VDA6.3 A-level factory.
