Professional Summary

Supply chain professional with 20 years at Volkswagen and Audi, focused on supplier capability, supply resource planning and cross-functional risk management. Audited 100+ Asia-Pacific suppliers, coached 13 on operational improvement and supported six project launches. Built supplier performance rules and a system-supported review process, while leading three direct reports across 150+ material groups and 500+ parts. Worked with Volkswagen Group China, FAW-Volkswagen and suppliers in Germany to align capacity, delivery and launch readiness; consulting assignments delivered measurable cost and inventory improvements.

Education

Sep 2002 – Jun 2006 | Shanghai Maritime University
Bachelor of Engineering in Marine Engineering

Professional Experience

May 2022 – Present | Audi China
Supply Chain Auditor and Planner

- Supplier assessment and development: Audited end-to-end supply chain processes at 100+ Asia-Pacific suppliers, covering demand, procurement, production planning, material flow and shipping. Coached 13 suppliers on corrective actions and supported six new project launches.
- Supplier maturity and capacity: Supported 11+ key PPE China suppliers under QPNi requirements, including capacity planning, ramp-up and bottleneck resolution. At a German brake-caliper supplier, helped reduce assembly cycle time from 35.4 to 27.3 seconds per unit, approximately 23%.
- Consulting framework: As a founding core member, helped establish Audi China's external supply chain consulting framework within three months; assessed supplier operations and translated findings into planning, capacity and inventory improvements.

Selected Project | Supplier Planning and Cost Improvement (2025)

- Diagnosed weak plan attainment, excess finished-goods and raw-material inventory, and urgent freight costs at manufacturing clients. Reworked demand processing and S&OP with client teams to align production and inventory policies.
- Used a self-developed tool to calibrate production master data and effective capacity. Applied Pareto analysis to inventory value and turnover, then worked with planning and procurement teams to adjust lead times, MOQs, handling units and raw-material stocking.
- Follow-up reviews approximately six months later showed related costs down about 17% at one German client, with delivery lead time reduced from 30 to 25 days. Another manufacturer reported related costs down about 14%, inventory days from 28 to 22, order fulfillment from 85% to 93%, and urgent freight cost share from 5% to 2%.

Jul 2010 – May 2022 | Shanghai Volkswagen Powertrain
Leader of BKM team (Supply Chain Resource Management)

- Team and supplier governance: Led three direct reports; assigned work, set goals, reviewed performance, coached staff and conducted first-round interviews. Coordinated with Volkswagen Group China, FAW-Volkswagen, procurement and quality on supply issues.
- Supply resource planning: Covered 150+ material groups and 500+ parts for a plant with peak annual output of 1.7 million engines. Combined 16-week forecasts, next-year capacity and launch demand to identify supplier constraints and support supply-side S&OP.

- Risk and decision support: Developed capacity and continuity responses with suppliers and internal teams; reported key risks to the General Manager and sought approval for buffer inventory or extra expenditure where needed.
- Supplier performance system: Organized monthly supplier reviews and corrective actions across capacity, delivery accuracy, timeliness and packaging. As SRS project lead and company key user, translated assessment criteria into system-supported management rules.
- Lifecycle and inventory: Coordinated new-part ramp-up, engineering changes and old-part phase-out; balanced supply continuity with buffer stock, VMI and warehouse constraints to control residual-material risk.

Selected Project | German Supplier Coordination (2014)

- Traveled to Ilsenburg, Germany, to negotiate and sign a logistics execution agreement with ThyssenKrupp in response to a cylinder-head-cover module supply shortage, supporting project delivery.

Selected Project | Semiconductor Supply Risk Early Warning (2021)

- Coordinated engineering, procurement, logistics and quality teams to screen 489 production parts and identify 35 semiconductor-related parts. Classified risks by origin and type, and used rolling inventory updates at critical nodes to provide at least eight weeks of advance warning.

Jul 2006 – Jun 2010 | Shanghai Volkswagen Powertrain
Material Planner

- Operated SAP MRP and Web-EDI; maintained lead times, MOQs and safety stock, tracked deliveries and expedited shortages. Adjusted delivery frequency and handling units with logistics planning to balance supply and warehouse occupancy.
- Core member and key user for the 2009 SAP MRP and Web-EDI rollout, shifting plan release from Excel and email to system-supported processes and receiving time windows.

Supplier Management and Professional Capabilities

Supplier assessment: End-to-end audits and corrective-action coaching; VDA 6.3/6.8 and QPNi methods.
Supplier performance: Capacity, delivery and packaging criteria; monthly reviews and SRS rule implementation.
Supply planning and risk: S&OP supply inputs, launch ramp-up, inventory policies and semiconductor risk monitoring.
Systems and tools: SAP MRP, Web-EDI, SRS, Excel and PowerPoint; self-developed capacity analysis tools.
Team development: Led three direct reports; SAIC external lecturer (2020–2022).
International collaboration: Worked with Audi colleagues in Germany and Mexico; Audi internal meetings and emails in English; CET-4.

核心简介

20 年大众及奥迪供应链经验，聚焦供应商能力评价、供应资源规划与跨部门风险管理。审核亚太区 100+ 家供应商，辅导 13 家改善运营并支持 6 个新项目启动；参与建立供应商绩效评价规则与系统化管理流程。曾带领 3 名直属成员，统筹 150+ 材料组、500+ 零部件供应风险；与大众中国、一汽大众及德国供应商协同产能、交付和项目起步，咨询项目取得可量化的成本与库存改善。

教育背景

2002.09—2006.06 | 上海海事大学 | 轮机工程 | 本科（工学学士）

工作经历

2022.05—至今 | 奥迪（中国）企业管理有限公司
供应链审核与规划员

- 供应商评价与培育：审核亚太区 100+ 家供应商的端到端供应链过程，覆盖需求、采购、生产计划、物料流及发运；辅导 13 家供应商整改运营问题，支持 6 个新项目启动。
- 供应商成熟度与产能：参与 PPE 中国项目，推动 11+ 家关键供应商按 QPNi 要求建设供应链能力，支持产能规划、爬坡及瓶颈改善；某德资卡钳供应商装配节拍由 35.4 秒 / 件降至 27.3 秒 / 件，缩短约 23%。
- 咨询机制建设：作为初创核心成员，参与在 3 个月内建立奥迪中国对外供应链咨询框架；将供应商运营诊断转化为计划、产能及库存改善措施。

重点项目 | 供应计划与成本改善咨询（2025 年）

- 针对制造客户计划达成率低、成品与原材料库存高及紧急运输费用问题，梳理客户需求处理与 S&OP 流程，调整生产及库存策略。
- 自制工具校准生产主数据和有效产能；结合库存金额与周转开展帕累托分析，协同物料计划及采购团队优化交付提前期、最小订货量、包装 / 搬运单元和原材料备库。
- 咨询实施后约 6 个月回访：一家德资客户相关成本降低约 17%，交付周期由 30 天降至 25 天；另一家制造企业相关成本降低约 14%，库存周转天数由 28 天降至 22 天，订单满足率由 85% 升至 93%，紧急运输成本占比由 5% 降至 2%。

2010.07—2022.05 | 上海大众动力总成有限公司
Leader of BKM team（供应链资源管理团队）

- 团队与供应商管理：带领 3 名直属成员，负责分工、目标设定、绩效评价、培训带教及招聘初面；协同大众中国、一汽大众及采购、质量团队解决中国区供应问题。

- 供应资源规划：覆盖 150+ 材料组、500+ 零部件，服务单厂峰值年产 170 万台发动机。结合 16 周滚动预测、次年产能和新项目需求，识别供应商资源约束，支持供应侧 S&OP。
- 风险与决策支持：与供应商及内部团队制定产能协调和保供方案；在生产周例会上向公司总经理汇报关键风险，推动备库及额外支出方案审批。
- 供应商绩效体系：组织月度评价及整改，覆盖产能、交付准确率、及时率和包装；作为 SRS 项目负责人及公司 Key user，参与将评价规则转化为系统化管理流程。
- 生命周期与库存：协调新件爬坡、工程变更和旧件退出；结合备库、VMI 及仓储约束平衡供应连续性与剩余物料风险。

重点项目 | 德国供应商协同（2014 年）

- 为解决缸盖罩壳模块资源紧缺，赴德国 Ilsenburg 与蒂森克虏伯商谈并签署物流执行协议，支持项目按计划推进。

重点项目 | 芯片供应风险预警（2021 年）

- 组织开发、采购、物流及质量团队排查 489 个量产零部件，识别 35 个涉芯片零件，按产地与类型分类管理；通过关键节点库存滚动通报，将相关断供风险预警提前至少 8 周。

2006.07—2010.06 | 上海大众动力总成有限公司
零件筹措 / 物料计划员

- 操作 SAP MRP 并通过 Web-EDI 发布计划，维护交付提前期、最小订货量及安全库存，跟踪到货与缺料催交；协同物流规划调整交货频次及包装 / 搬运单元。
- 作为 2009 年 SAP MRP 与 Web-EDI 上线核心成员及 Key user，参与物料计划由 Excel 和邮件发布转向系统化运作，引入收货时间窗。

供应商管理与专业能力

供应商评价：端到端过程审核及整改辅导；VDA 6.3 / 6.8、QPNi 方法。
绩效机制：产能、交付与包装维度月度评价，参与 SRS 评价规则及系统实施。
供应规划与风险：S&OP 供应侧输入、新项目爬坡、库存策略及芯片风险预警。
系统与工具：SAP MRP、Web-EDI、SRS、Excel、PowerPoint；自制产能分析工具。
团队培养：管理 3 名直属成员；上汽集团培训中心外聘讲师（2020—2022 年）。
国际协作与英语：与德国、墨西哥奥迪同事协作，奥迪内部会议及邮件使用英语；CET-4。
